## **DETAILED ACTION**

### ***Drawings***

Figure 3 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance. Figure 3, both in the specification and in the prior informal drawings (11/20/03) was identified as prior art, the new formal drawings (11/14/05) do not state prior art. correction is required.

### ***Claim Rejections - 35 USC § 112***

Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Applicant states a frame, a first frame and a second frame. It is not known which frame the initial frame is referring to.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 & 4-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Schneiter (USPN 4,960,970).

Schneiter discloses an apparatus and method for laser drilling in which the workpiece vibrates. An Nd-YAG laser is used for drilling and the system uses a plano-convex lens (14). The laser processing apparatus applies a laser pulse to the workpiece causing vibration, which is acoustically monitored. The method is accordance with this invention for laser processing a workpiece comprises vibrating the workpiece by applying laser pulsed light thereto; acoustically monitoring the vibrations in the workpiece and determining vibrational changes. (abstract, figures, col. 1. lines 6-9, 60-68, col. 2, lines 1-2, 14-35, col. 3, lines 8-15)

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 3 & 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schneiter, as stated above and further in view of Mosavi et al. (USPN 6,252,195).

Schneiter discloses laser drilling and the vibration of the workpiece, however, a surgical needle workpiece is not taught.

Mosavi et al. discloses forming holes in a surgical needle using an Nd-YAG laser. High energy laser pulses form a blind hole in the proximal end of a surgical needle. (abstract, figures, col. 1, lines 15-20, 49-67, col. 2, lines 57-67)

It would have been obvious to one of ordinary skill in the art at the time of the invention to make surgical needles, as taught by Mosavi et al., in the Schneiter system because the vibrational system ensures a high quality bore hole.

### ***Response to Arguments***

Applicant's arguments filed 11/14/05 have been fully considered but they are not persuasive. Applicant argues that the prior art does not teach a spherical lens. The examiner respectfully disagrees for multiple reasons. First, applicants' own admission in the arguments states that a plano-convex lens is a form of a spherical lens and this is well known in the art (see US 892 references). In addition, applicant uses open language, that is, comprising which includes the use of a plano-convex lens, which by applicant own admission is a spherical lens.

Applicant arguments with respect to the frame system are moot, in view of the 112 rejections.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See US PTO-892.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to M. Alexandra Elve whose telephone number is 571-272-1173. The examiner can normally be reached on 6:30-3:00 Monday to Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Pat Ryan can be reached on 571-272-1292. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

January 21, 2006.

M. Alexandra Elve
